

Interested in an
ENVIRONMENTALLY CONSCIOUS
Laundry while Reducing Costs
and Protecting Quality?

Try the: **U.N.X. INCORPORATED**
Enzyme Program

Quality ♦ Savings ♦ Protection

With our enzyme program,
quality is protected and
rejects are reduced!

Because typical enzyme
formulas do not exceed
120°F, *energy costs* can be
reduced by 20-30%.

Extend usable linen life due to
less aggressive products and
lower temperatures.

Enzyme products allow for dramatic savings in
fresh-water, gas, electricity and waste water
expenditures, as well as lower
formula time and linen replacement costs.

Call Today for YOUR Energy Assessment or Demonstration!
