FLO-MET
Silicate Alkali Builder

Description of Product

FLO-MET is a liquid alkali silicate builder characterized by high pH and high active alkalinity. Especially applicable for industrial operations. Increases capacity of wash solution to retain oils and greases.

Where to Use

- Use in industrial, hospitality and health care operations for faster and more complete dispersion of released soils. For heavy or extra heavy soil classifications.

Features

1. **FLO-MET**'s two fold attack on soil: by high pH and by silicates.
2. Silicates contribute to increased dispersion of soils which leads to faster removal of contaminants.
3. Accelerates draining and rinsing efficiency.
4. Color: Natural

For specific usage instructions, please contact your local U.N.X. Territory Manager. After a comprehensive survey of your operation, a customized procedure will be developed.
