## Section 4: First-aid measures

### Non-emergency personnel

**General advice:** safely remove victims from the danger zone. Provide emergency services with this safety data sheet.

**Eye contact:** rinse with plenty of water for at least 15 minutes. If irritation persists, get medical attention.

**Skin contact:** rinse with plenty of water.

**Ingestion:** rinse mouth with plenty of water, do not induce vomiting. Get medical attention if symptoms occur.

**Inhalation:** bring victim out to fresh air. If the person is unconscious or symptoms occur, get medical attention immediately.

### Emergency personnel

**Personal Protection:** refer to Section 8 for specific personal protective equipment

**Notes to physician:** the concentration and length of exposure impacts the severity of the symptoms.

### **Most important symptoms/effects, acute and delayed:**

Refer to Section 2 for hazards and Section 11 for information on health effects and symptoms. Treat symptomatically.

**Indication of immediate medical attention and special treatment needed, if necessary:** provide general supportive measures. Eye contact, inhalation, and ingestion cases should be treated immediately. Have procedures and facilities in place to treat these cases of exposure.

## SECTION 5: Fire-fighting measures

**Suitable extinguishing media:** use water or foam at the source of the fire. Foam is preferred as water may cause the corrosive product to splatter. Water spray on large fires may be ineffective but may be used to keep fire-exposed containers cool.

**Unsuitable extinguishing media:** do not use a water jet as this can spread the fire. Do not use carbon dioxide in enclosed spaces with insufficient ventilation.

**Specific hazards arising from the chemical:** burning releases oxygen, sodium ions, silicic acid and oxides of phosphorus/sodium. Do not breath in the fumes caused by the fire. Move container of the product that are not exposed to the fire if able to do so safely. Containers can melt from the heat and the combustible material may provide fuel to the fire. Withdraw immediately in cases of rising sound from venting safety device or discoloration of tanks. For massive fire in cargo, use unmanned hose holder or monitor nozzles. If not, withdraw and let fire burn out.

**Special protective equipment for fire fighters:** wear full protective airtight garment and NIOSH approved self-contained breathing apparatus with independent air-supply. Fight the fire in early stages if safe to do so. Provide sufficient ventilation and be aware of hydrogen generation upon reactions with some metals. Do not allow contaminated extinguishing water to enter the soil, ground-water or surface waters.

## SECTION 6: Accidental release measures

**Personal precautions, protective equipment and emergency procedures:** ventilate and restrict access to the area of leak or spill. Have emergency procedures in place for treating incidents, evacuation and informing the emergency services. Refer to Section 8 for personal protective equipment.

**Environment precautions:** clean up spills/leaks immediately and prevent it from spreading. Large or uncontrolled spills to water systems must be reported to appropriate regulatory body.

**Methods and materials for containment and cleaning up:** absorb spills with non-combustible absorbent. Dam and absorb with sand, earth or other inert material for large spills/leaks. Collect spillage in containers with labeled contents and dispose according to local regulations. Flush the contaminated area with lots of water.

## SECTION 7: Handling and storage

**Precautions for safe handling:** Refer to Section 8 for personal protective equipment. Do not eat, drink or smoke when handling the product. Avoid skin and eye contact. Follow general hygiene routines after working with the product. When handling large amounts of the product, be sure to have a safety shower nearby.

**Conditions for safe storage:** store in a suitable, closed and labeled container upright at temperature between 40°F and 100°F in a well-ventilated area. Opened containers must be properly resealed to avoid spillage. Store away from heat, direct sunlight and moisture. It is preferred to keep the container on sump pallets. Store in high-density polyethylene containers. See Section 10 for incompatible materials.

## SECTION 8: Exposure control/personal protection

### Control Parameters

#### Occupational exposure limits

#### U.S. ACGIH Threshold Limit Values

Chemical Name	CAS-No.	Type	Values
2-(2-Butoxyethoxy)ethanol	112-34-5	TWA	10 ppm
		STEL	1 ppm

### Appropriate engineering controls/ventilation system:

A general exhaust system is recommended to keep employee exposures below the limits. An additional local exhaust system is preferred in order to control emissions at its source.

### Personal Protective Equipment (PPE)

**Respiratory Protection:** A NIOSH approved full-face respirator with high efficiency dust/mist filter is recommended. For emergencies or when dealing with unknown exposure measures, use a full-face piece positive-pressure, air-supplied respirator fitted with a suitable cartridge for the chemical. Consult respirator supplier regarding the compatibility of the equipment.

**CAUTION:** Air purifying respirators do not protect the user in oxygen deficient atmospheres, use an air supply system.

## SECTION 8: Exposure control/personal protection (Continued)

**Hand Protection:** impervious gloves, with suitable protection for workplace, are recommended any time the product is being handled. Consult glove supplier for details on suitability, breakthrough time and permeability. Frequent change of the glove is advisable. Be aware that latex gloves can trigger an allergic reaction to sensitive individuals.

**Eye Protection:** use chemical safety goggles and/or full-face shield when handling the product.

**Skin/Body Protection:** wear impervious protective clothing, boots, gloves, lab coat, apron or coveralls, as appropriate, to prevent skin contact. Take additional precaution if handling amounts past the exposure limits.

**Thermal Hazard:** wear thermal protective clothing when necessary

**General Hygiene:** change out of clothes, thoroughly wash your hands and clothes, and shower/bathe as soon as possible. Do not eat, drink, smoke or use the bathroom while handling the product.

**Other Protective Measures:** have an eye wash and safety shower station close by. Routinely wash all equipment to remove contaminants.
